Typically, beats that are licensed out exclusively sale for higher due to the massive and residual sales potential of the artist purchasing it.

*PSA: If you are an “amateur” or “hobbyist” artist do NOT contact me in hope to get me to drop my prices with low-ball offers!)*

As for the independent underground artists and major artists that are serious about purchasing a beat from me exclusively, prices begin at \$333 for the independent artist and end at \$1,500. As for major artists looking to purchase an exclusive rights license for a beat, prices begin at \$3,000 and end at \$30,000. The prices obviously reflect the size of the artist’s fanbase or following, his/her budget, and their intent of use.
